

## THE WORLD OVER

### THE DOUKHOBOR TROUBLE

British Columbia jails, and Federal penitentiaries are now teeming with members of the Christian Community of Universal Brotherhood, who have disobeyed the laws of the country by their nude parades to show their dislike and antagonism against certain enforcements, principally that of sending their children to school, when they should—in their belief—be earning their own living within the colony. Not only this, but it is probably true, that the leaders of the sect and the parents of the children do not desire their offspring to be educated for fear that they will know more than their forefathers and with a general education and a knowledge of the world affairs and other countries, they may in later years break away from the colony.

The Province of British Columbia has announced that it will attempt to settle once and for all time, its Doukhobor troubles and their recent action of sentencing the law breakers to three years in the country's prisons substantiates their determination to do so.

Canada and the western provinces have put up with the lawlessness of the Doukhobors quite long enough and it was time that action was taken. In the last few years many schools have been burned; a railroad train was blown to bits; nude parades have been held, and many other ways and means have been taken to defy the laws of the country. It is not too late to read the riot act to these law breakers and should any more attempts be made to disregard the laws the country should not hesitate to seize their property and deport the whole colony or colonies.

We do not believe that the country should permit the colonization methods of the Doukhobors, principally the method of collective living and buying. With so many people in one colony trouble is almost certain to crop up when a fanatic or fanatics get together and poison the peaceful minds of many against the laws of the country. The colonies themselves may be prosperous, but they are of no benefit to a growing country such as Canada. They produce crops under almost Soviet Russian methods and their produce floods the markets and only tends to keep down prices. They operate on a 'take all, give none' basis and this practice should be curtailed—by law.

## Our Sports Day?

The value of a sports day cannot be measured in dollars and cents. It is priceless. Therefore, we should not let the matter drop. Instead a public meeting should be called and a date set far enough in advance so that the other settlements of the district will not plan sports when Carbon does. What do the citizens of Carbon think about the sports day? It isn't beyond our means and power to put over a good field day here. We have the men to look after things, the ground, the attractions and everything for a grand and glorious entertainment. All we need is a little collective thinking at a well representative meeting of the Carbon citizens. Will we ever have this meeting?

## TRACK MEET AT TROCHU JUNE 4

All teachers in Mr. McLean's Inspectorate are reminded about the track meet to be held in Trochu on June 4. There will be running and jumping for children of all ages. If you have not received your poster please write to Mr. Gillespie at Trochu and he will be only too glad to send one to you. Needless to say, any who are interested in the school sports will be welcomed there on June 4, and any cooperation in supplying cars for transportation will be greatly appreciated.

## CARBON STREETS PUT IN SHAPE

This week the Village Council has made some improvement to the streets in town, and the main thoroughfares have been graded by the Municipal road grading outfit under the capable supervision of the Gimbel brothers. The streets are now in good shape and comparatively free from rough spots and Carbon can boast of as good a set of streets as any other place of its size in the province.

## Sports Day Held at Trochu

Saturday, May 7, was the scene of a large sports day in Trochu, the Trochu School Inspectorate holding their second annual sports day there on that date. The 56 teams entered, representing schools from Content Bridge to Morrin.

The large crowd were enthusiastic and helped the day by encouraging the boys and girls in their games. A high standard of playing was shown in the various classes of baseball, basketball, and football. The 43 games which were played were fine examples of sportsmanship and is a most necessary training for every boy and girl. The teachers are doing their part in encouraging the development of outstanding athletes, who may in time represent Canada at future Olympics.

In the boys' softball event, Delburne won from Carbon.

In the girls' softball event Florence won from Carbon.

### AN ECONOMIC RIDDLE

I venerate economists  
As very learned blokes,  
But when in paradox they speak  
Their meaning oft I vainly seek,  
Suspecting subtle jokes,  
They say the whole world's down and out.

But here's what I can't see:  
If every land beyond all doubt,  
In all the earth is up the spout—  
Then who's the mortgagee?

Do we owe money in the moon,  
Or some celestial land?  
Or have we creditors in Mars,  
Or other fixed or unfixed stars,  
Who hold our notes in hand  
If not, why all the fuss and fret:  
I've conned it o'er and o'er,  
And find no clear solution yet,  
If all the earth is deep in debt,  
Who is the creditor?

When men go into bankruptcy

## ALBERTA NEWS

The Village of Hussar is wide awake in spite of the recent fire, which destroyed a number of business places, and will hold their annual celebration on May 24th.

According to The Three Hills Capital, considerable land in that district is changing hands at fair prices, this being an indication that times are getting better.

A ravaging fire from an unknown origin destroyed the barn and all contents at the farm of Ben Gaetz, last Monday night, near Mayton. Nine horses, twenty pigs and five calves were burned to death, besides a quantity of feed and harness being destroyed.

More than 400 farmers in all parts of Alberta have taken advantage of the one-year forage crops seed distribution plan of the Dominion government.

Disturbed while in the act of robbing Jas. Johnson's store last Friday, a robber made his get-away with \$21 taken from the till. Two shots from the pistol on Constable Ingeberg failed to halt the midnight thief.—Bassano Mail.

An Indian driving an Essex coach turned over on the river hill going to Arrowwood last week and after the car hit the bottom, it turned over and burned up. The Indian and his wife escaped injuries.—Gleichen Call.

The annual Department of Education examinations will commence on Thursday, June 16th, according to an announcement made recently by Hon. Perren Baker, Minister of education. The papers have been set, passed by the board of revision and are now being printed.

Charging that the present government of Alberta, rather than the U. F. A. party, as having "forfeited the confidence of the people," F. C. Moyer, M.L.A. Drumheller, leader of the Independent group in the Legislature, recently outlined plans for the organization of a new "Provincial" party to participate in the next general election in Alberta.

A. L. Alpaugh, one of the Dowling Lake residents, was found dead recently with a broken neck, sustained when he fell from his saddle horse.

### CANADA'S WHEAT CARRY-OVER SMALLEST SINCE 1928

Canada's total carry-over of wheat when the present crop year ends on July 31, is estimated at around 103,000,000 bushels, the smallest since 1928, which should have a decided bearing on the outlook for better prices for this season's crop, according to the Agricultural Department of the Canadian National Railways. Over 99 per cent of Canada's wheat exports during the first three months of this year were shipped from Canadian seaports. Among the wheat consuming countries France has the highest per capita, 7.5 bushels annually; Canada ranks thirteenth, 4.5 bushels.

### CARD OF THANKS

The executive of the Carbon School Fair wish to tender a vote of thanks to the artists of Webb S.D. who presented their program in Gamble school a short time ago. The sum of seven dollars was realized and greatly appreciated.

The case is plain as day:  
What is not in the dear wife's name  
Grim creditors will promptly claim,  
And assets melt away.  
But when a whole wide world's in soak  
And cannot raise the tin,  
Here's where I half suspect a joke:  
When all the world goes stoney broke,  
Who puts the bailiffs in?

—The Cow Bell

### 50c A QUART FOR MILK

The provincial government taking over the milk industry of Manitoba, and running it as a public utility, will have no bearing on the price of milk in the Bay line settlement at Pikwitonel. The one cow residing in this country has a monopoly on the milk industry there, and no price war can be waged despite the fact that milk there costs 50 cents a quart. The cow, Betsy Jane, was brought north last year and supplied travellers on the Hudson Bay Railway trains with the only fresh milk along the 500-mile run.

## Carbon at Acme

Carbon school girls visited Acme on Thursday evening and tried conclusions with the Acme school girls in a game of baseball. At first the Carbon visitors were getting the best of it, and it looked as though Acme was going to get badly beaten, but they "bucked up" eventually, and gained a small margin of victory for Acme, the score being 44-55 in favor of Acme.—Acme Sentinel.

### EARLY CLOSING BY-LAW

The Village of Carbon has a by-law on its books, stating that all retail stores in Carbon must close every Wednesday afternoon at one o'clock, during the summer months of May, June, July and August. Why don't the Council enforce this by-law? There are some business places in Carbon now selling goods over the counter on Wednesday afternoon in open defiance of this by-law. Now is the time to put a stop to it!

One of the hens on the farm of Elza Long in the E. A. district must have been doing a "loop the loop" stunt. Last week an egg of very unusual size and shape was found, which rattled when shaken as though there were a box inside it. The egg itself measured 8½ inches long and it was seven inches around the thickest part and weighed 5½ ounces. The egg on being broken was found to contain another egg, which was quite normal.

## GRAIN FIELDS SHOW GREEN

Spring wheat in the Carbon district has made rapid progress so far this season and in many cases the new grain is three inches above the surface. Practically all the wheat seeding in the district has been completed and moisture has been abundant this spring. Since the big storm of four weeks ago, we have had more than an inch and a half of rainfall, the last moisture coming last Friday night, after most of the farmers had completed wheat seeding, and it is estimated at that time that nearly an inch of moisture fell.

As a result of this last rainfall the gardens have received the most benefit and growth has been rapid with the warmer days. Conditions are very favorable and the weather man is certainly obliging this spring.

## Long Years Ago

(Gleaned from the Files of the Carbon News, eleven years ago this month)

All hail to the new council. At last we are beginning to see the results of their four months in office. The Carbon main street is getting a regular spring overhauling.

Mr. Clarence Hay is home from Calgary and has accepted a position in the drug store.

Mrs. G. W. Malton, whose husband is operating the Midland elevator here, has taken up residence in Carbon.

We would like to advise Charlie Gardner that a raw beef-steak properly applied to the point of contact, will absolutely reduce his features to their former passiveness.

On going to press we learn that Bill Braisher suddenly became the proud possessor of a "Tin Lizzie."

Harry Bruels has sold a new Dodge to Charlie Nash, and a Chevrolet to Fred Morrison.

## Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

The Carbon Chronicle

Our idea of a smart girl is one who can make her complexion taste as good as it looks.

### ONE-DOLLAR VALUE FOR 59c

One regular 50c box of Day Dream Face Powder and—your selection of and 50c Day Dream article, Both for ..... 59c

The assortment includes Day Dream Vanishing Cream; Cold Cream; Rouge; Brilliantine, solid or liquid; Shampoo; Glycerin & Rosewater. One week only, until Thursday, May 26th.

## The Past, The Present and The Future.

Poets have written of "The past I leave behind"; men of affairs have stated the same thing; wayfaring youth promising to reform have made such declarations; all of us have been exhorted to "let the dead past bury its dead."

But can the past ever be left wholly behind? Does it not always intrude into the present and even project itself into the future? Is not the present made up largely of the accumulated experiences of the past, and will not the future be moulded in the experience of today? All history proves that this is so.

Furthermore, even if it were possible to leave the past behind, to wipe the whole slate clean and begin all over again as if what has gone before had never been, would it be a wise course of action? In some respects, perhaps, yes; in other respects most decidedly, no.

The past, it is true, is now only of value for the experiences it has provided, for the lessons it has taught, for the accumulations of wisdom it has thus stored up for our guidance, for the advances that have been made, and are now ours, in the onward and upward march of the race since prehistoric days. And it is because of these gains that it would be most unwise to completely blot out the past, even if we could.

Even the mistakes, the errors, the foolishness, the sins of the past should not be forgotten; they, too, have their value. They are the signposts along the road of the present, stretching on into the future, to warn us of dangers, to point out what to avoid.

But the past and its experiences, insofar as they resulted in discouragements and disappointments, weakening our wills, breaking our courage, lessening our initiative and energies, should be relegated to the limbo of the forgotten. They have no value, and constitute nothing but hampering drags now and throughout the days and years to come. They may well be wholly erased from our memories; left to the past to be forever buried by and in it.

And the present? It is our only opportunity. We may have a future, and we may not; no one can tell. But we have the present; it is now ours to use or abuse. And we have the past to guide us in the manner and method of its use. And the future, if we are accorded one, will largely be what we make it by the use, or abuse, we make of the present.

Down through the ages our customs of life, our daily habits, our modes of thought and action, our institutions of government, our community existence, even our physical beings, have been developing and moulded to the forms of today. Man has profited by the lessons and experiences of the past, and he must continue in the present to profit, to learn, and to apply his learning to the problems of the present if his own future, and the future of his children and of the race, is to be better and brighter than is the present.

From the dark ages to the present, mankind and the world in which we live has progressed. At different stages progress has been achieved by great upheavals, by revolution, but it has been through the less spectacular peaceful processes of evolution that the greatest upward strides have been made, those having the most far-reaching, most beneficial and lasting results for the betterment of all. This very fact, these experiences out of the past, have a lesson for the world of mankind today.

We have been suffering from a so-called business and economic depression. Times have been difficult and discouraging. Men and women in all countries and in all walks of life have been, and many still are, discouraged. Some are desperate, and talk revolution. But the past, if we will heed its warnings, teaches us that by revolution they suffered the most, whatever may have been the ultimately beneficial reforms which followed, while it has been by and through evolution that the greatest gains and blessings to the masses of the world's inhabitants have been secured.

In times like the present, men's views become distorted and their thinking unsound. This is but natural; it is, indeed, human nature. They are prepared to go to extremes in the present without counting the cost of what the future will call upon them and their descendants to pay for the mistakes they may thereby make.

The present, therefore, is not a time for men to say: "The past I leave behind," except in the sense that they leave the errors and follies and unsound thinking of the past out of their reckoning and plans for the present and future. Rather it is a time to remember and closely study the past, the experiences of the past, and the results which flowed from those experiences, with a view and a determination to profit thereby, rejecting what time and experience has proven to be bad, and incorporating, extending, strengthening those ideas and principles which have revealed their soundness into the warp and woof of the future.

### Growing Their Own

Gardeners in Iceland are using the hot springs for horticultural purposes with such good results that they claim that Iceland need import no more foreign vegetables—they can grow sufficient to supply the whole island. The islanders are starting a campaign with the slogan: "Buy Icelandic."

Nowadays people not only refuse to give credit where credit is due, but they won't give credit where cash is due either.

### Showed Great Vitality

Remarkable vitality was shown by a hen that was buried under a heap of garden and path cleanings at Palmerston North, New Zealand, for twenty-four days. A neighbor heard it cackling and found it after investigation. It was weak and emaciated, but made a good recovery.

Psychologists find, in tests, that stimulating effects of caffeine in coffee and other beverages become less as the user grows accustomed to the drink.

## Her Heart Was So Bad Couldn't Do Housework

Mrs. S. Dragoman, R.R. 2, Midland, Ont., writes:—"I had been troubled with heart trouble for many years."

My heart would beat so fast I could hardly breathe, and I had headaches, and dizzy and fainting spells.

I couldn't get my housework done I was so weak. I took three boxes of Milburn's Heart and Nerve Pills and felt much better, and now I would not be without them in the house."

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

### New Thieving Plan

Scotland Yard Looking For Gang Robbing Letter Boxes

A gang specializing in a combination of thieving and forging are occupying the attention of Scotland Yard. In search of letters containing checks, they fish in public and private letter-boxes, using flypaper as bait. Much of this work must prove futile, unless they have inside information or work at auspicious times, such as the first of the month.

Forgery of the purloined checks is a specialized job, which can be detected only by the use of ultra-violet rays and the aid of a handwriting expert. The gang's methods are so characteristically clever that they offer to Scotland Yard a ready means of identifying their handiwork.

If Edgar Wallace were still alive, a new book or play featuring these novel exploits might be expected in a few weeks—or even days.

## Acids In Stomach Cause Indigestion

Create Sourness, Gas and Pain.  
How To Treat.

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed and food sour, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist some Bismarck Magnesia and take a teaspoonful of powder or four tablets in water right after eating. This sweetener of the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

### Isabella Horses Are Scarce

Special Breed Can Be Obtained Only In Germany

Isabella horses are being sought in Germany by Captain Hopkins, regarded as one of the best judges of horses in India, at the behest of a Maharajah. They are a special breed with brownish yellow coats and white manes and tails. They are wanted to draw the Maharajah's state coaches. Horses of this type used to be bred throughout Europe by various princes, the studs of the Kings of Hanover in Herrenhausen, being specially noted for them, but now so far as is known they are only bred by one private dealer in Germany.

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

### Origin Of The Sandwich

It seems that the spirit of the age is against tea. "I wouldn't dream of taking up time and space with all the paraphernalia of a tea table," says a very modern hostess; "We usually play bridge and a stop for tea would be a nuisance." So we are back again at the days when my Lord Sandwich, too busy with gambling to bother about lunch, invented the snack which bears his name.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvellous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

### Larger Greenhouse Area

Glass used in the greenhouses and hotbeds on Vancouver Island and the Lower Mainland, British Columbia, covers an area of approximately four million square feet, an increase of over 200 per cent. in the past eight years.

The North Pole is not by any means "the coldest thing in the universe." Liquid hydrogen has a temperature of 422 degrees below zero.

W. N. U. 1942

## Eno keeps you Clean Inwardly

It's far more important to clean the inside than the outside of a milk bottle. For the same reason, clean intestines are far more important than clean face and hands. Nothing will cleanse your intestines better than ENO'S "Fruit Salt." Take it regularly, morning or night. Be ENO conscious!

CaW1

# ENO'S "FRUIT SALT"

### A Promising Sign

Many New Manufacturing Industries Are Starting In Britain

Students of the British industrial situation are pointing out that the returns from the Patent Office indicate an increased tendency to protect in Great Britain the production of commodities which heretofore have been largely supplied from foreign countries.

It is of great interest to note, in this connection, that there have been many applications for patents for silk manufacture, hitherto largely controlled by France; for laundry machines, up to now regarded as an exclusive American monopoly; and for dye and alloy manufactures, of which Germany has been the principal originator in the past.

In all these varying fields, new industries have sprung up in the Old Country, and so far as dyes and alloys are concerned, the manufacture is now predominately British, while silks and other products are being manufactured in Britain in ever-increasing volume. At a time when business is supposed to be going to the bow-wows, surely this is a promising sign.

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

### Radio In Dummy Funnel

This Innovation Will Be Seen On New British Liner

A dummy funnel will be used to house the wireless equipment of the White Star liner "Georgic," which is rapidly nearing completion at Belfast.

The aerial and direction finder both will be inside the giant funnel, and thus screened effectively from local electrical disturbances. The top of the funnel will be open, and with the aerial fitted on the roof of a cabin inside, it will be possible to obtain uninterrupted wireless signals for direction finding. The screening will be so complete, in fact, that the usual work of eliminating electrical interference from the ship's motors will be unnecessary.

Like her sister ship the "Britannic," the "Georgic" will have two huge elliptical funnels, but as she is a motor vessel, only one is needed as an exhaust and ventilator.

### Flivver Derails Freight Train

Knocks Eight Freight Cars Off The Track at Level Crossing

They tell of a mouse falling into a rum barrel and crawling out crying for lions to fight.

Recently at a level crossing near Gravenhurst, Ont., a "flivver" side-swiped a Canadian National Railway freight train and derailed eight cars. It charged screeching and died screeching, a total wreck, but in its death agonies it guarded its owner-driver, T. E. Callon, Orillia, and another passenger, William McEachern, both of whom escaped with minor bruises. None of the train crew was injured.

Why suffer needlessly! Douglas' Egyptian Liniment brings quick, sure relief to scald feet, soft corns and warts. Relieves inflammation. Removes proud flesh.

### Trapper Meets Tragic End

Perishes From Cold In Shack In Northern Woods As Result Of Accident

Solution of a five-month mystery and the end of a Royal Canadian Mounted Police search came recently with the arrival at The Pas of a Mountie patrol under Constable W. Barret, bringing the body of Oscar Morrell, missing trapper, from one of his trapline shacks 34 miles east of Mile 374 on the Hudson Bay Railway lines.

Morrell left Mile 374 on Christmas Eve last, planning to be gone two weeks on a hunting trip. It is believed while covering his trapline he accidentally discharged his rifle and blew off his right hand. Driving his team of dogs, he staggered through the snow to one of his trap-line shacks, where he made a rude and futile effort to stop the flow of blood from his injured arm. As he weakened rapidly he built up the fire in the shack to keep out the freezing winds, using chairs, part of his bed, and even his snow-shoes in his effort to keep warm.

When friends here became alarmed at his long absence, a detachment of Mounties set out to search for him, and broke into his shack to find his body in the grim setting of his lonely struggle against death. His body was brought to The Pas for identification and burial. He is believed to have lived in Winnipeg and Saskatoon before coming north to trap.

### No Wood Is Solid

The solidest and soundest kind of wood is not really solid at all. It is full of air—twenty to forty per cent. of its total bulk consists of gases, trapped in the minute tubes and cell cavities that all wood is made of. This appears from the researches of Dr. D. T. MacDougal, of the Carnegie Institution of Washington, who reported them.

## Economic Organization Within The British Empire Is Urged For Boosting Inter-Empire Trade

Formation of a permanent economic organization within the British Empire and elimination of party politics from imperial trade conferences were urged by Hon. Frank Carrel, prominent Quebec publisher, as steps toward restoring inter-empire trade. The proposed permanent economic organization should be similar to the League of Nations, Mr. Carrel said in his address to the Canadian Club and Calgary Board of Trade members.

The speaker believed one important result of the coming Ottawa Imperial conference would be the organization of such an economic body as he suggested. This body would "technically, scientifically, and economically find the solution to many problems now engrossing all the peoples of the empire." Prominent Englishmen were rapidly becoming converted to the idea, he continued, and sympathy was growing stronger throughout the empire.

Mr. Carrel's plan also included an empire educational campaign through the press, platform and radio; founding of an empire commercial university, assistance in the promotion of British branch factories; co-ordination of trade agencies and consular services; construction of empire warehouses in leading industrial centres, possibly by creation of free ports; interchange of business data throughout the empire; uniform cable codes and, finally, effecting favorable treaties with world trading stations.

### Great Bear Lake Minerals

Many Claims Have Already Been Staked and Great Activity Shown

According to reports reaching Ottawa, a great many mineral claims have already been staked in the area adjacent to Great Bear Lake, North West Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by aeroplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the Topographical Survey, Department of the Interior, Ottawa, has reprinted the manual respecting the survey of mineral claims in Dominion Lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

### U.S. Wheat Exports

Made International Gain In March Over Recent Months

Wheat exports of the United States made a substantial gain in March over recent months. The index was 79, as compared with 73 in February and 74 in January. A year ago it was 53. All other export groups, however, fell off sharply.

All principal European countries except Italy took more wheat in March than a year ago. Total exports thus far this season amounted to 106,998,000 bushels against 102,309,000 a year ago.

"Are you going to take this lying down?" boomed the candidate. "Of course not," said a voice from the rear of the hall, the shorthand reporters are doing that."

"When is high tide, captain?"  
"At 5.55 p.m. But I have told you twice already."  
"But your chin waggles so comically when you say 5.55."—Hummel, Hamburg.

W. N. U. 1942

## Bees Are Preparing For Season's Work

Abundant Food and Protection From Cold Essential To Strong Colonies

During the winter months there is little or no activity within a bee colony, for during the cold weather the only matter of concern to the bees is to secure enough food and to keep warm.

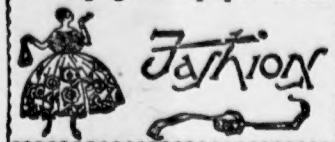

Sometime last fall the queen ceased her egg-laying, and as the combs became empty of brood they were filled with food for the winter. As the weather became cool the bees gradually clustered closer and closer around their queen until finally a fairly compact cluster was formed, and, except during an occasional spell of warm weather, this cluster may remain unbroken for a period of five or six months.

During the winter, the cluster moves about within the hive, at all times keeping in contact with the food supply. Towards spring an unknown something will inform the bees that summertime is again on its way and the cluster will gradually loosen and expand and in the centre of the cluster the queen will again resume her work of egg laying. Only a few eggs are laid at the start, but as the days lengthen and the sun becomes stronger, the number gradually increases until as high as 2,500 may be deposited daily.

In outdoor wintered colonies, egg-laying usually commences some time during the month of March, depending greatly upon the weather. In some localities such activity may be resumed even earlier. Cellar wintered bees do not usually start so early as outdoor wintered bees, except under abnormal conditions. This early egg-laying is of great importance to the beekeeper, for it is the eggs laid during the spring and early summer that will produce the bees to gather the honey harvest. The larger the force of field bees at the commencement of the harvest, the greater will be the crop, and it follows that the greater the number of eggs laid during the early part of the season, the larger will be the field force. To get the maximum number of eggs laid, three things are necessary. A vigorous and prolific queen; an abundant food supply, and adequate protection from cold and changeable weather. Neglect to supply any one of the three will result either in starvation and death of the colonies or in colonies that are too weak in bees to gather a surplus of nectar when the honey flow is on.

Telegraph wires in East Africa have to be carried on exceptionally high poles owing to the liability of giraffes breaking the cables.

## Winnipeg Newspaper Union

### SMALL DAUGHTER FOLLOWS SUIT IN GUIMPE DRESS MUMMY IS WEARING

Add this new guimpe dress to small daughter's wardrobe—both you and she will love it!

The clever design of this model has taken yellow swiss with white dots for the blouse. Plain linen in French blue made the skirt and suspender straps. It's a most pleasing combination.

Of course all sorts of attractive summery materials could be used for this cunning model. Tomato-red pique with white dimity with tiny pin red dots is very effective. Navy blue sheer wool with the guimpe of red and white checked gingham is quaint and extremely fashionable.

Style No. 434 is designed for sizes 6, 8, 10 and 12 years. Size 10 requires 1 1/2 yards of 35-inch material for blouse and 1 1/2 yards of 39-inch material for skirt and trim.

Price of pattern 25 cents in stamps or coin (coin is preferred.) Wrap coin carefully.

## Report Of Committee Favors A Nationally-Owned Radio Broadcasting System For Canada

### Schools Need Freedom

England Taking Advantage Of New Idea Of Education

English education is very much alive. There are still dull patches in it, of course; but, go where you will, you are never far from a school which is showing strong power of adaptation to the new needs of the community. Three times before in history English education has flushed with renewed energy; first under Alfred, next at the time of the Reformation, and last in the early days of Queen Victoria. But never till now has it been free from the cramping influences of poverty. Today it is well furnished and free in its choice of methods of work. The teachers are at liberty to try new ways of teaching; to get into the open air; to use other tools than the pen. A school needs space, zest and freedom if it is rightly to train those who a few years hence will make or mar the tone and temper of town and village, of factory, shop and farm. Not all the schools have yet made full use of their new opportunities. But England is now dotted over with good examples of the new education.

### Seed Oats From Alberta

Further Supply Has Been Ordered For Saskatchewan Areas

Further shipments of seed oats will be made from Alberta to the drought-stricken areas of Saskatchewan, according to G. M. Stewart, district inspector of the Dominion seed branch in Calgary.

Some time ago one million bushels of seed oats were shipped from the Peace River area to Saskatchewan. The further shipments will be made from other parts of Alberta only as the surplus supply of seed oats in the Peace River country has been used.

Mr. Stewart said a request has been received from Saskatchewan authorities for additional supplies of seed oats. The previous shipments having been insufficient.

### Will Not Need Fire

Civilization Of Future Will No Doubt Have Substitute

The prediction that fire, which has played so strategic and friendly a role in man's progress, will be needless in future civilization was made by Dr. Walter Hough, chief curator of anthropology of the U.S. National Museum. Dr. Hough based his prophecy that we shall become independent of fire upon the ground that other natural forces will be utilized. The germ of this future phase of civilization is already developing in modern invention, Dr. Hough said.

Canada will have a nationally-owned radio broadcasting system if the report tabled in the House of Commons is implemented by parliament.

Highlights of the report are:

Establishment of a chain of high-power national stations located at suitable intervals across Canada, their exact position to be determined after a careful technical survey.

Appointment of a federal commission of three, with assistant commissioners for each province, "to carry on the business of broadcasting."

Establishment of trans-Canada chain broadcasting as "one of the first duties" of the commission.

Advertising to be limited to not more than five per cent. of each program period.

Location, where required and under private ownership if desired, of as many stations of 100 watts or under as may be deemed necessary for complete coverage.

All revenues from license fees and advertising to be expended in the interests of radio, and license fees to be fixed by the governor-in-council.

The report, which was brief and left the working out of details to the commission pays tribute to the present radio broadcasting stations in the following words:

"They entered as pioneers in a field of service in the art of radio and, under trying handicaps and sacrifices, worthily kept pace with a science fraught with ever-changing improvements and developments, and rendered this service under handicaps, which is most praiseworthy."

The committee expressed the belief, however, "that the present system, excellent as it is in certain respects, does not meet the requirements in quality and scope of broadcasting to insure its maximum benefits."

The report, presented by Hon. Dr. Raymond Morand (Cons., Essex East), bears the endorsement of the entire committee of nine members.

### Saving Canada's Antelope

Interesting Chapter In The Story Of Wild Life Conservation

The history of Nemiskam National Park, Alberta, Canada, is an interesting chapter in the story of wild life conservation. Overcoming what appeared to be insurmountable difficulties, forty-two antelope were enclosed in a fenced-in area in southwestern Alberta in 1915, and, in contrast to previous experiments, continued to thrive in captivity. Their welfare and propagation, which at first was a matter of speculation, now seem to be definitely assured, as officials of the National Parks of Canada, Department of the Interior, report that the herd now totals 425.

### Record For Inventions

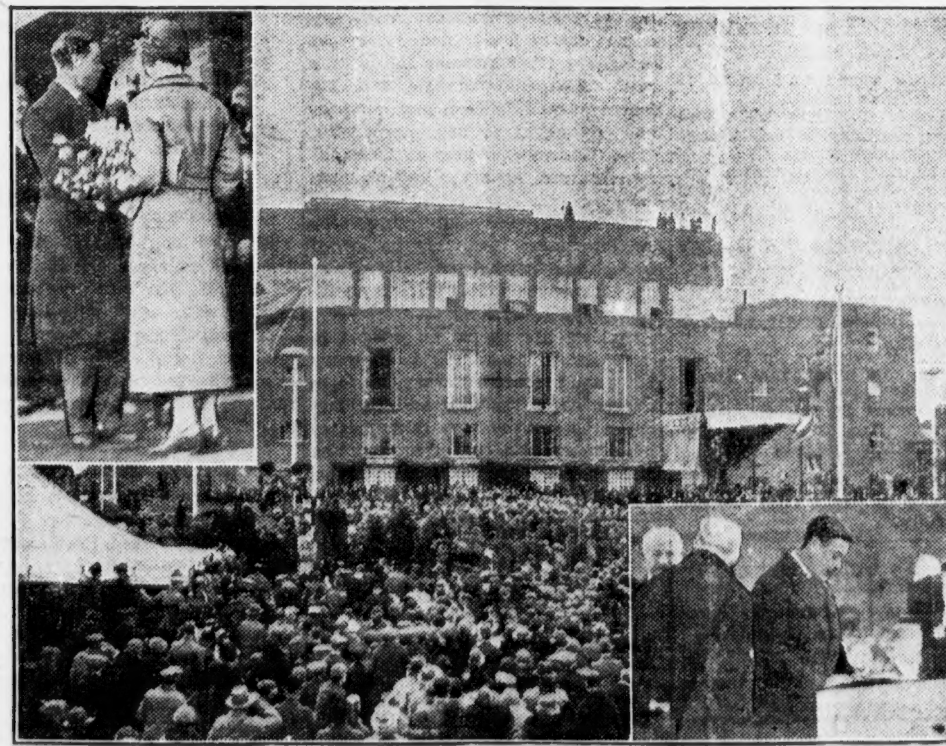

The Wall Street Journal says: "Depression, as well as necessity, may lay claim to being the parent of invention, for within the last six months the number of inventions patented or awaiting patent papers is greater than in any similar period on record in this country. It seems that unemployed men are using their enforced leisure to perfect mechanical devices of all sorts."

The oldest oak forest in Europe is standing in Oldenburg, North Germany. The trees date back to the Middle Ages.

"Master, I've found lion tracks in the north."  
"Good, let us go south immediately."—Hummel, Hamburg.

## THE GREAT DAY AT STRATFORD-ON-AVON

These pictures give a few glimpse of the ceremonies which marked the opening of the Shakespeare Memorial Theatre at Stratford-on-Avon, England. The main photograph shows part of the huge crowd gathered in front of the new theatre while inset (top left) the Prince of Wales is introduced to Miss Elizabeth Scott, the architect. Lower right, His Royal Highness can be seen making his speech at the opening of the Memorial Theatre.

## RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

— With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

*Wm. A. Fletcher*  
**CASTORIA**  
CHILDREN CRY FOR IT

## WORLD HAPPENINGS BRIEFLY TOLD

Lord Irwin, former viceroy of India, said he was encouraged with the spirit of optimism in western Canada.

Prince Peter of Montenegro, brother of Queen Elena of Italy, died recently at Bolzano, Italy.

Green peas, the seed of which are said to have come from King Tutankhamen's tomb, are being grown by M. Pejstrup at Pass Lake, Ontario.

The United States senate rejected a proposal for a year's suspension of military and naval armament construction.

There has been an increase of 580 head of cattle shipped to Great Britain through Montreal port over the same period last year.

Manitoba, Saskatchewan, and Alberta government representatives will meet early in June to prepare statements for the forthcoming Imperial Economic Conference.

Captain Hilton H. Bailey, who with Simon Lake, the inventor of the submarine, hopes to raise the "Lusitania," states actual work on the project will begin early this fall.

Commander F. W. Nelles has been appointed commander in charge of Halifax naval port. Commander V. C. Brodeur at Halifax now will go to Esquimalt.

It is proposed to form a pool for carrying on export business from Canada to Latin-America, to prevent Canadian goods losing their identity on passing through United States hands.

Winston Churchill, former Chancellor of the Exchequer, in an address recently, asked the United States and Great Britain to join forces in leading the world "out of these gloomy caverns into the broad sunlight of activity and progress."

If the Dominion Government assumes 75 per cent. of old age pension costs, the City of Calgary will ask the Alberta Government to assume the 10 per cent. of the cost now borne by this city, according to a statement by Mayor Andy Davison.

Czecho-Slovakia may increase its sales tax by 25 per cent.

## Collected Queer Articles

### So-Called Pauper With Fortune In Bank Had Odd Hobby

Investigators in Hamilton, Ontario, probing the strange case of Abadiah Markie, the so-called pauper who died leaving a bank account of \$14,000 found themselves faced with the most baffling collection of articles ever seen outside of a museum today.

Markie died over a month ago, apparently in penury, and was buried at the city's expense. Later it was discovered he had \$14,000 in the bank. Large packing cases were located in a storage warehouse, in Markie's name, and were opened in the presence of witnesses.

Among the things found were these: Notepaper of the Royal Hotel, many years defunct; 200 rubber heels, old-fashioned bartenders' rubber shirt fronts, a collection of 300 hats—coachmen's hats, plaid caps, derbies which revealed every fashion from the 80's onward; a large assortment of keys for opening sardine cans, huge stocks of bedding, coat buttons, hairpins, powder puffs of yesteryear, soup spoons, patent eye testers, sample books of greeting cards, paper ice cream spoons and many other peculiar articles.

### IT'S EASY FOR A SCARF EFFECT THAT WILL "STAY PUT"

Delightfully young and smart is this new slim-line model.

Since crepe silk both plain and printed is so charming, it was chosen for this fascinating model.

It is light navy blue spotted in red. The soft crushed scarf collar gives it such distinction in plain white crepe.

Another ideal suggestion is plain crepe in soft beige shade self-trimmed.

For summer wear, handkerchief linen prints, batiste prints and tub silks are nice mediums.

You'll find it very simple to fashion and the cost unbelievably small.

Style No. 899 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 16 requires 3 1/4 yards of 39-inch material with 1/2 yard of 39-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap collar carefully.

## Great Canadian Hero

### Colonel Mulloy Set High Example For Loyalty To The Empire

Colonel Lorne Winfield Mulloy, D.C.M., B.A., died unexpectedly at his home on the St. Lawrence River, Iroquois, Ontario, at 11 p.m. Sunday, February 21st, 1932, from heart attack, aged 53 years. Thus, with dramatic suddenness, there was removed from Canadian public life, one of its most brilliant intellects and inspiring figures.

Blinded in the South African War, Colonel Mulloy mastered every obstacle imposed by his wounds, cheerfully created fresh obstacles to surmount, scorned the paths of least resistance, was supremely successful in all tasks he undertook, and his death came at a time when his powers of intellect and his great executive abilities appeared destined to still further achievements.

Born on a Canadian farm, blinded in his early twenties, he continued his education with the aid of a secretary, graduated with honors from two famous universities, became one of the most outstanding speakers of our day on subjects of political economy, was offered more than once a seat in the British House of Commons, was on the staff of the Royal Military College, became a successful practising lawyer, and his services to Canada during, and immediately after the war, were sufficiently conspicuous to deserve amplification.

He has been referred to as the father of Union Government in Canada. His fight and arguments for compulsory military service are believed to have been the deciding factor in causing the United States to declare against the inefficiency of voluntary enlistment.

As early as 1910 he was one of the leaders in Great Britain in the fight for tariff reform and Empire preferences, such as are now being negotiated by the several governments affected.

Mulloy's physical handicap was not perceptible to his friends, and he refused to recognize his lack of sight as either a misfortune or a handicap. His physical assurance was magnificent. He could swim, ride, row, fish, or drive a golf ball with any man. Alone he has piloted a row boat across the St. Lawrence River in a gale. He could untangle a fishing line more quickly than any companion. He never walked except at a stride. He has ever been an incessant traveller, and he never had an accident!

His humour was scintillating, clear and infectious; invariably he looked through and beyond the dark side of life. He was the soul of sincerity, generosity and integrity.

Mulloy's life should be printed in every school book, told from every pulpit and repeated at every Canadian fireside. As a practical and thrilling inspiration to the boys and girls of this country, this epic of courage and triumph and high ideals will perhaps never be exceeded.

## Acidity Overcome

### Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Biliousness, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red pkgs., everywhere. Ask for Carter's by NAME.

## SUNDAY SCHOOL LESSON

MAY 22

### JACOB AND ESAU RECONCILED

Golden Text: "Be ye kind one to another, tenderhearted, forgiving each other, even as God also in Christ forgave you."—Ephesians 4:32.

Lesson: Genesis 32, 33.

Devotional Reading: Matthew 6:9-15.

### Explanations and Comments

Jacob's Precautions, verses 1, 2.—Looking up Jacob saw Esau approaching with four hundred men. The presence of so many men with Esau may be accounted for by his having just made his expedition to Mount Seir, where he conquered the land in which he afterwards settled, Genesis 36:6, 7. Edersheim suggests that he may have wished at the same time to make his brother anxious and to show him the contrast between their respective positions. Jacob evidently feared the worst. He was keenly aware of what he deserved at his brother's hands. He arranged his little company and put the handmaids and their children first, Leah and her children next, and in the safest place in the rear, his best-loved ones, Rachel and Joseph.

"Though courts of law neglect to curb transgression, The court of conscience always is in season."

The Meeting Of the Brothers, verses 3-11.—Jacob passed over the ford first and showed Esau the greatest reverence by bowing himself to the ground seven times. Esau ran to meet and embrace Jacob, falling on his neck and kissing him as was the custom among friends. Had Jacob's present and his flattering attitude disarmed him? Dr. Skinner thinks that Esau's intentions were hostile and that Jacob gained a diplomatic victory over him. Rather does it seem that Esau had no thought of vengeance, he had dismissed the affair of the birthright with a shrug, as it were, and now virtually said, "Don't mention our trouble. I have got along famously without the birthright and without you." Whatever the actuating motive he was magnanimous.

"If thou must have thy revenge on thine enemy, heap coals of fire on his head, forgive him, and enjoy it."—Thomas Browne.

## Recipes For This Week

(By Betty Barclay)

### LEMON SPONGE PIE

(Makes 1 pie)

- 3 egg yolks, beaten thick.
- 5 tablespoons lemon juice.
- 1 teaspoon grated lemon rind.
- 1 cup sugar.
- 3 tablespoons flour.
- 1/2 teaspoon salt.
- 1 tablespoon melted butter.
- 1 1/4 cups milk.
- 3 egg whites.

Uncooked pastry.

Combine all ingredients, folding in last stiffly beaten egg whites. Turn into pie tin lined with uncooked pastry and put into hot oven (450 degrees Fahrenheit). After 10 minutes reduce heat to moderate (350 degrees Fahrenheit) and bake 20 minutes longer, or until filling is firm.

### ALL-BRAN QUICK BREAD

- 3 cups flour.
- 2 cups all-bran.
- 1/2 teaspoon salt.
- 1/2 teaspoon soda.
- 2 teaspoons baking powder.
- 1 tablespoon sugar.
- 1/2 cup molasses.
- 2 cups milk.
- 2 eggs.
- 2 tablespoons melted butter.
- 1 cup chopped nuts.

Sift dry ingredients. Add bran. Then add molasses, egg slightly beaten to milk. Stir into dry ingredients, mixing well. Add nuts and melted butter. Pour into a well greased loaf pan. Let stand 15 minutes. Bake in a moderate oven, (325 degrees Fahrenheit) from one to one and one-half hours.

### Largest Welded Bridge

What is considered the largest welded bridge in the world has just been completed in Pilsen, Czecho-Slovakia. It crosses two railroad tracks, has a span of 161.4 feet, and a width of 27.4 feet. The total weight is 145 metric tons, which is said to be 21 per cent. less than that of a riveted structure designed for the same purpose. Another unusual feature is the spiral ramp at one end, necessitated by limited space.

Old Faithful geyser in Yellowstone national park shoots to a height of from 85 to 130 feet.

## "LOCK YOUR DOOR ON BIRTHDAYS!"

SAYS  
HUGH TREVOR

Famous Screen Star

HUGH TREVOR

"The woman who wants to win and hold adoration should keep youth," Hugh Trevor says.

"Stage and screen stars hold the admiration they have won year after year. Birthdays don't matter at all. And nowadays other women are learning their complexion secret!"

"Every woman should learn the complexion secret these screen stars know!"

The stars do know the secret of growing lovelier each year!

"Regular care with fragrant Lux Toilet Soap is the secret," the famous actresses will tell you. "This lovely white soap keeps skin youthfully aglow."

That is why Lux Toilet Soap is the official soap in the dressing rooms of all the great film studios! Your skin will respond to it, too! The caress of dollar-a-cake French soap for just 10c. a cake!

## Russia Arranges

Credit With Turkey

### Based On Goods Exchange Without Actual Money Payments

A new economic alliance between Soviet Russia and Turkey, under which this country is extending an \$8,000,000 long term credit to its Islamic neighbor, has been announced by Foreign Minister Tewfik Rushdi Bey of Turkey.

The credit is the first ever granted by the Soviet Government, which until now has been a seeker instead of a giver of credit in the world market. It is based on an exchange of goods in kind without actual monetary payments.

Under the agreement Soviet Russia will sell industrial tools, agricultural machines and fertilizers to Turkey, receiving as payments its choice of Turkey's natural resources, such as tobacco, wool, fruits and minerals.

## Some Amazing Facts

### Many Objects Which Seem Small Are Very Wonderful

A drop of blood contains three million red globules, and there are more germs in the milt of a single codfish than men in the world. So small is this germ that one grain of sand is four million times larger than it. A hundred threads of the silkworm are just one-twenty-fifth of an inch thick when placed side by side, but there are some metals that can be drawn out to such a fineness that twelve hundred wires are only as thick as a hundred silkworm threads.

Egypt's great river, the Nile, has its origin in tiny springs in the Mountains of the Moon. These are a range near the equator in the Belgian Congo between Lake Edward and Lake Albert.

## Teething

"Baby's Own Tablets take away that teething fever," writes Mrs. Alfred Bungay, North Sydney, N.S. Effective also in relieving colds, fever, colic, upset stomach, constipation. Children like them. Absolutely SAFE.

—See analyst's certificate in each 25c package. 231

Dr. Williams' **BABY'S OWN TABLETS**

## NEW POLITICAL PARTY ADVANCED FOR ALBERTA

Drumheller, Alberta.—An independent political organization for Alberta, drawing its support from all spheres of life and from all old political units was announced by F. C. Moyer, Independent M.L.A. for Drumheller, in an attack on the Farmer Government of Alberta. Mr. Moyer was giving an account of the past session of the Alberta legislature to his constituents.

"This new party, to be called the Provincial Party, is a development and enlargement of the independent idea in Alberta politics, uniting all forces in opposition to the present government and enlisting all who are prepared to contribute their ideas and efforts toward the betterment of the province," Mr. Moyer declared.

"It is not a Conservative movement, it is not a Liberal movement, it is not the Farmer or Labor Party in a new guise. But we welcome all who seek not the success of a party but of a people. No one person or group has a monopoly of wisdom, so we seek all classes that we may have a cross-section of the life of the province."

In launching the plans for organization of the Provincial Party Mr. Moyer emphasized that it would be based on the Independent principle. No candidate who was elected under the auspices of the new party would be forced to follow the dictates of the party's cabinet if it were elected to power in Alberta.

"We want the elected members to go on the floor of the legislatures and speak as their judgment dictates. This of course," he said, "involves the abolition of the old rule that the defeat of a government bill means the resignation of the ministry. But why should the government resign except on a want of confidence motion? The mayor does not resign if some idea of his is overruled."

"We believe this system will result in better legislation and better legislators. If you keep a child in swaddling clothes it will never develop to much of a man, and if you stutify the intelligence and expression of a private member of the government side, by making him simply a voting unit, you may lose the aid of one who might have developed into a real counsellor. Why should not our legislation be the thought of the majority of the whole legislature instead of the majority of the government group?"

On the proportion of votes cast at the general elections in Alberta in 1930, said Mr. Moyer, the Independents should have nine representatives in the legislature. Instead, they had only three.

Referring to organization, Mr. Moyer said that because he was the present leader of the group of three Independents, it did not necessarily follow that he would be the leader of the Provincial Party. "Many strong men will be found in our ranks after the next election, and it is for them to elect a leader," he declared.

### Tax Boost In Ireland

#### Steep Increases In Tariffs Proposed In De Valera Budget

Dublin, Irish Free State.—Steep increases in tariffs and income taxes were proposed in the first budget of the De Valera government, which was introduced in the dail eireann.

The budget provided for a duty on tea of four pence a pound and a package tax of two pence on each container holding any article of food or drink, or cosmetics or medical preparations packed for sale.

The income tax rate would be raised from three shillings six pence to five shillings in the pound.

Drastic action was necessary to make both ends meet in the nation's finances because President De Valera's government faced a budgetary deficit of £3,500,000.

The budget provided for extending the entertainment tax to cover dancing, outdoor sports, horse racing and dog racing. It also set forth an increase of one shilling two pence a pound in the duty on tobacco.

W. N. U. 1942

### Drama Of the Skies

#### Two Men Of Mooring Crew Lose Lives When Dirigible Attempts To Land

Camp Kearny, Calif.—A tragic drama of the skies was written in an unsuccessful attempt of the world's largest airship, the "U.S.S. Akron," to land here.

Two men of the mooring crew were dashed to death and a third, Bud Cowart, was carried two hours dangling on a 300-foot rope from the navy airship.

Ten thousand spectators saw the two fall as the dirigible surged upward. Cowart swung precariously half a mile over their heads. Women screamed, men wept.

Then he was rescued, hauled into a hatch of the big ship. A message dropped from the big bag.

"Cowart OK," it read.

A vast sigh of relief went up.

The climax to the westward crossing of the Akron, which left Lakehurst, N.J., on its first trans-continental trip, came during efforts to make an emergency mooring at Camp Kearny after an aerial voyage fraught with storms.

Several attempts to bring the great skyliner down had been made by a determined ground crew when upward currents suddenly caught the great ship.

Robert Edfall and Nigel Henton, both of the San Diego naval training station, and Cowart clung to the landing line, to the horror of the watching throng as the Akron surged upward. Edfall and Henton lost their grip and fell to death, but Cowart clung on.

Upward the great ship swept with Cowart dangling on the line 300 feet below the dirigible. A height of 2,000 feet was reached but Cowart maintained his precarious grip. Through bumpy air the Akron sailed, but Cowart clung on.

Minutes that seemed like hours to the gasping crowd below passed as the Akron cruised through the bumpy air, rocking up and down, with the plucky Cowart dragging along. Then it was noted the distance between Cowart and the Akron began slowly to diminish.

There was no winch on the rope. It was slow work hoisting Cowart up by hand. At last he was dragged through a cockpit.

### Creation Of Federal Farm Board Considered

#### Announcement Made At Ottawa By Hon. Robert Weir

Ottawa, Ont.—A commission of experts will inquire into the feasibility of creating a farm products marketing board.

Hon. Robert Weir, Minister of Agriculture, announced in the House of Commons that in view of the Imperial Economic Conference the government did not consider the board should be established at the present time.

A marketing board, to deal with exports of agricultural products has received considerable study in the past few months. Members from all parties in the House have contributed to the discussion.

It was understood the board's activities would apply not only to butter but to many farm products in which the exportable surplus is relatively small in comparison with the domestic consumption.

One of the board's functions would be to handle the export surplus in such a way that Canadian prices would not fluctuate widely, due to the domestic price being affected by the world figure.

#### Allowed To Sell Cattle

Moscow, Russia.—Russian farmers have been given the right to sell their cattle in the retail markets for the remainder of 1932. This marked another step in the liberalization of the Soviet farm code, to encourage individual farmers—whether collective or independent—to seek the open market.

#### Delegates Sail For Home

Hamilton, Bermuda. — Carrying with them to their home parliaments new information on Imperial trade, British and Canadian delegations to the tri-partite conference here sailed from Bermuda May 11. Work of the conference was concluded May 9.

### HELD IN SLAYING

Filing a murder charge against Captain W. N. Lancaster, British aviator and partner of Mrs. Jessie Keith-Miller, Australian flier, climaxed a ten-day investigation into the death of Haden Clark, author, at Miami, Florida. It is believed that Clark had taken his own life, but now police charge that notes which led to that belief were forged.

### Delegates Will Come From All Dominions

#### Full Representation Assumed For Imperial Conference At Ottawa

Ottawa, Ont.—Mutual advantage to every section of the far-flung Empire will be the objective of the Imperial Conference, which opens in Ottawa, July 21, said Premier R. B. Bennett, during an hour devoted to considering problems to be faced at the commonwealth gathering.

Preparations were well advanced, he said. Committees were gathering information on the three broad subjects to be discussed—trade, communications and currencies.

The Prime Minister will head the Canadian delegation and ministers will be called in, depending upon the subjects under review. Every Dominion has accepted the invitation to be represented, and with the exception of New Zealand and the Irish Free State have named their delegation, Mr. Bennett said.

#### Should Be Well Informed

Ottawa, Ont.—The necessity of fostering an informed and understanding Canadian public opinion in the work of the League of Nations, especially now with critical days ahead, was stressed by Dr. H. M. Tory, president of the League of Nations Society in Canada, when he welcomed delegates to the tenth annual meeting here.

China is one of the few great countries where airplanes have come into use for commercial transportation before adequate railway systems were developed.

### No Wheat Bonus

#### Both Bushel and Acreage Basis Plans Are Rejected

Ottawa, Ont.—A bonus scheme for wheat, on both a bushel and acreage basis, was turned down definitely by the House of Commons. Without a recorded vote two motions were defeated, the first from Robert Gardiner, leader of the farm bloc, suggesting continuation of the five cent bounty on export wheat, and the second from Dr. Thomas Donnelly, Liberal, Willow Bunch, proposing a five cent bonus on a seed-acreage basis.

In discussing the question of wheat in its relation to the welfare of Canada and its importance to Canadian export trade, it must be remembered that the greatest proportion of wheat was produced in the prairie provinces, Mr. Gardiner declared. During the early part of the present century many people had been induced to go to western Canada by the great opportunities which were said to lie there in wheat-growing.

Progressive members had been long awaiting some declaration of policy from the government with regard to the wheat-growers. Mr. Gardiner realized that the members of the government were bearing tremendous responsibilities, and felt sympathy with them in the burden they were called upon to bear. But that fact did not relieve him from the responsibility of inquiring from the government what the policy was.

"We produce the best wheat in the world, and we are proud of it," Mr. Gardiner continued. But it cost about 76 cents a bushel to produce No. 1 wheat on the basis of twenty bushels to the acre. The price level for No. 1 wheat at the head of the lakes was approximately 59 cents a bushel. Consequently every bushel grown meant a loss of seventeen cents. The wheat farmer could not keep on very long with such prices.

Price of commodities which the farmer used were somewhere lower than in the past, he declared. On the other hand, they had not fallen to the extent which wheat prices had dropped.

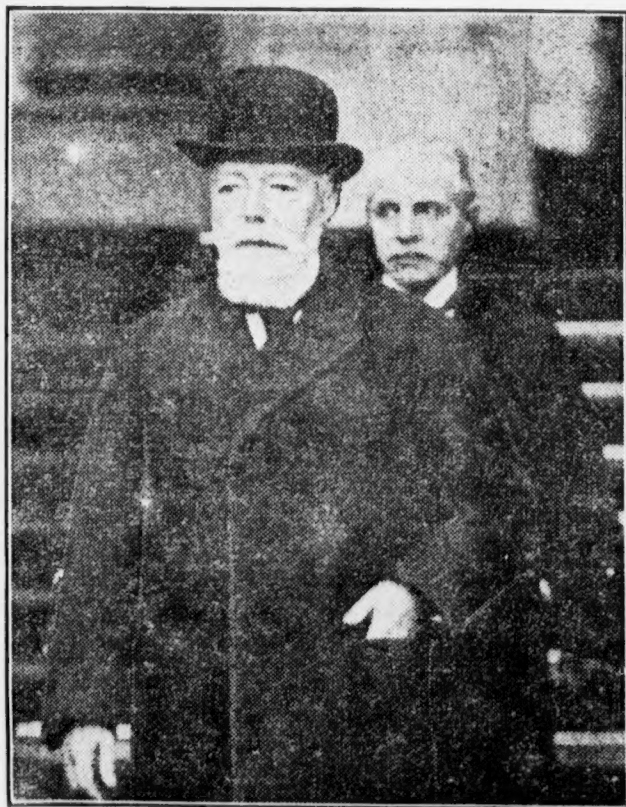

#### Preserve Historic Spot

Wellington, New Zealand. — Lord Bledisloe, Governor-General of New Zealand, and Lady Bledisloe, have purchased "Maitangi," the most historic spot in New Zealand and the place where the treaty establishing British sovereignty was signed in 1840, and will present it to the nation. The action prevents it falling into the hands of a citizen of the United States who had been making offers.

Russia gave the largest group of new citizens to Canada in 1931.

Airmen flew from Margate, England, to see a fire at Sandwich.

### FRENCH PRESIDENT VICTIM OF ASSASSIN'S BULLETS

The report of the death of President Doumer of France as a result of assassin's bullets shocked the world. Doumer was one of the most popular presidents France has had, and his death at the hands of a fanatical Russian was a sad blow to his country. This photograph was taken recently as he was leaving the Senate Chamber in Paris.

## MILLIONS VESTED IN DOUKHOBOR HOLDINGS IN WEST

Victoria, B.C.—The extraordinary situation by which an enterprise valued at nearly six and one-half million dollars has been vested in the hands of Peter Veregin and 13 directors by the 5,000 Doukhobors of British Columbia, Alberta and Saskatchewan, is revealed in a study of the articles of incorporation.

With Veregin sentenced to three years in penitentiary following a perjury conviction in Yorkton, Sask., British Columbia authorities are watching carefully the future of the colonies in this province. It is stated that according to the constitution of the colonies it would be in the power of the 13 directors to expel the entire 5,000 members, under certain circumstances, and unless the government intervened. Such an action by the directors is very unlikely as the directorate has a payless army rolling up an increasing bank account. Veregin recently stated under oath that he had accumulated some \$700,000 during the past few years.

Incorporated as a Dominion corporation in April, 1917, with extra provincial registration in British Columbia, the Christian Community of Universal Brotherhood, Limited, of Canada, is capitalized at \$1,000,000. Of this capitalization, \$700,000 is paid up. But the issued shares are held in the names of Peter Veregin and 13 directors.

The colonists enjoy all belongings while members of the community, but have no right of ownership, having dispossessed themselves of such right some two years ago at a meeting in Brilliant, B.C. Members leaving or expelled forfeit their rights to property but may petition the supreme council of community economists which can allot them a share from the community's properties.

This latter provision, it is believed, has caused much of the Doukhobor trouble. The expelled Sons of Freedom are dissatisfied with the shares allotted them and have shown their indignation by nude parades and other activities which have brought them into conflict with the authorities. They refuse to attempt any court action against the community on the ground that it is against their religion.

Three courses are open to the 13 directors now that Veregin is under sentence. They may appoint a new leader, ask for a receivership, or request a winding-up order. It is believed disintegration might follow either one of the latter two courses, while a continuance of the present arrangements may not be acceptable to the young generation, who are said to be developing views in conflict with those of their elders.

Total Doukhobor holdings in Canada are shown as more than 67,000 acres of land, which, with other properties, are given a valuation of nearly \$6,500,000. Doukhobor activities in the three western provinces, outside of farming, include saw mills, planing mills, granaries, a box factory, a stove pipe factory, jam and canning establishments, fruit packing houses and a grain elevator.

Total Doukhobor assets in British Columbia are nearly \$4,500,000; in Saskatchewan more than \$1,250,000, and in Alberta more than \$500,000.

### Salvage Crews Working On Grain Elevators

#### Estimated Loss From Incendiary Fire Set At \$75,000

Meacham, Sask.—Salvage crews have commenced in the work of clearing up the debris of the three local elevators which were destroyed by incendiary fires May 7, with a resultant loss of 70,000 bushels of grain.

Estimated loss from the fires, including loss of wheat, has been set at \$75,000.

It is expected that the work of clearing up would take about two weeks. The Saskatchewan Wheat Pool, Alberta Pacific Grain Company and Standard Grain Company, owners of the three elevators, have signified their intention of rebuilding the structures.

R.C.M.P. are still investigating.

## LOST 30 lbs. FAT IN 3 MONTHS

AT THE AGE OF 40

"I was very stout, and I have taken Kruschen Salts for 3 months, and have reduced from 212 lbs. to 182 lbs. (age 40). I am a hearty eater, and have never dieted in any way. Also I have never felt any ill effects whilst I have been taking Kruschen salts."—T. H.

That is an instance of Kruschen succeeding without assistance. But if any fat person will be satisfied with a moderate diet, and will take one half teaspoon of Kruschen Salts in a glass of hot water before breakfast every morning—they can lose fat in just the same way.

This is what Kruschen Salts does—it cleans out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fills you with a vigor and tireless energy you'd almost forgotten had existed—you get the needed exercise.

As a result, instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of  
"The Splendid Folly," "The Hermit  
Of Far End,"  
Hodder & Stoughton, Ltd., London.

CHAPTER XXI.—Continued.

"Beg pardon, my lady," he said, touching his hat. "Sir Adrian sent me to say that he's waiting for you in the car just along the road there." He pointed to where, on the white ribbon of road which crossed the Moor not far from the base of the tor, a stationary car was visible.

Claire, her face ashen, turned to Nick in mute appeal.

"Sir Adrian? I thought he left for London this morning?"

Nick shot the question fiercely at the chauffeur, but the man's face remained respectfully blank.

"No, sir. Sir Adrian drove as far as Exeter and then returned. Afterwards we drove on here, sir, and they told us in the village we should find you at Shelston Tors."

Meanwhile the other members of the party were becoming aware that some contretemps had occurred. Claire's white, stricken face was evidence enough that something was amiss, and simultaneously Lady Anne and Jean hurried forward, filled with apprehension.

"What is it, Claire?" asked Lady Anne, suspecting bad news of some kind.

"What has happened?" Recognizing the Charnwood livery, she turned to the chauffeur and continued quickly: "Has Sir Adrian met with an accident?" She could con-

ceive of no other cause for the man's unexpected appearance.

"No, my lady. Sir Adrian is waiting in the car for her ladyship."

"Waiting in the car?" repeated Jean and Lady Anne in chorus.

The little group of friends drew closer together.

"Don't you see what it means?" broke out Claire in a low voice of intense anger. "It's been all a trick—a trick! He never meant to go to London at all. He only pretended to me that he was going, so that I should think that I was free and he could trap me." She looked at Nick and Jean significantly. "He must have overheard us—that day in the shrubbery at Charnwood—you remember?" They both nodded. "And then planned to humiliate me in front of half the county."

"But you won't go back with him?" exclaimed Nick, hotly. He swung round and addressed the chauffeur stormily. "You can damn well tell your master that her ladyship will return this evening with the rest of the party."

The man's face twitched. As far as it is possible for a well-drilled servant's face to express the human emotion of compassion, his did so.

"It would be no good, sir," he said in a low voice. "He means her ladyship to come. 'Go and fetch her away, Langton,' was his actual words to me. I didn't want the job, sir, as you may guess."

"Well, she's not coming, that's all," declared Nick determinedly.

"Oh, I must, Nick—I must go," cried Claire in distress. "I—I daren't stay."

Lady Anne nodded.

"Yes, I think she must go, Nick dear," she said persuasively. "It would be—wiser."

"But it's damnable!" ejaculated Nick furiously. "It's only done to insult her—to humiliate her!"

Claire smiled a little wistfully.

"I ought to be used to that by now," she said a trifle shakily. "But Lady Anne is right—I must go." She turned to the chauffeur, dismissing him with a little air of dignity that, in the circumstances, was not without its flavor of heroism. "You can go on ahead, Langton, and tell Sir Adrian that I am coming."

The man touched his hat and moved off obediently.

"Nick and I will walk down to the car with you," said Lady Anne. She was fully alive to the fact that her escort might contribute towards ameliorating the kind of reception Claire would obtain from her husband. "Jean dear, look after everybody for me for a few minutes, will you? And," raising her voice a little, "explain that Claire has been called home suddenly, as Sir Adrian was not well enough to make the journey to town after all."

But Lady Anne's well-meant endeavor to throw dust in the eyes of the rest of the party was of comparatively little use. Although to many of them Claire was personally an entire stranger—since Sir Adrian intervened whenever possible to prevent her from forming new friendships—the story of her unhappy married life was practically public property in the neighborhood, and it was quite evident that to all intents and purposes the detestable husband had actually insisted on her returning with him, exactly as a naughty child might be swept off home by an irate parent in the middle of a jolly party.

It was impossible to stem the flood of gossip, and though most of it was kindly enough, and wholeheartedly sympathetic to Lady Latimer, Jean's cheeks burned with indignation that Claire's dignity should be thus outraged.

The remainder of the afternoon was spoilt for her, and Nick's stormy face when he, together with Lady Anne, rejoined the rest of the party did not help to lighten her heart.

"I'm so sorry, Nick," she whispered compassionately, when presently the opportunity of a few words alone with him occurred.

He glared at her.

"Are you?" he said shortly. "I'm not. I think I'm glad. This ends it. No woman can be expected to put up with public humiliation of that sort."

"Nick!" There was a sharp note of fear in Jean's voice. "Nick, what do you mean? What are you going to do?"

There was an ugly expression on the handsome boyish-looking face.

"You'll know soon enough," was all

## Best oil cheapest in home, says factory sup't.

"The last thing we'd try to economize on," says the superintendent of a large eastern factory, "is lubricating oil. By using cheap oil we could 'save' hundreds of dollars each year—but it would cost us thousands of dollars for repairs, replacements and lessened efficiency of equipment."

The same is true in the home. If all housewives knew what factory men know about lubrication, few of them would use anything but 3-in-One Oil for their expensive sewing machines, vacuum cleaners, electric fans, lawn mowers, washers, and other household devices. 3-in-One, a blend of mineral, vegetable and animal oils, is the best oil for household use, for it cleans and protects as well as lubricates.

Ask for the old reliable 3-in-One Oil at good drug, grocery, hardware, department and general stores. For your protection, look for the trade mark "3-in-One" printed in Red on every package.

he vouchsafed. And swung away from her.

Jean felt troubled. She had never seen Nick before with that set, still look on his face—a kind of bitter concentration which reminded her forcibly of his brother—and she rather dreaded what it might portend.

Her thoughts were still occupied with the afternoon's unpleasant episode, and with the possible consequences which might accrue, as she climbed into Burke's high dog-cart.

She had had a fleeting notion of claiming Claire's vacant seat for the homeward run, but had dismissed it since actually Claire's absence merely served to provide comfortable room for Blaise in the Willow Ferry car, which had held its full complement of passengers on the outward journey. Moreover, she reflected that any change of plan, now that she had agreed to drive back with Burke, might only lead to trouble. He was not in a mood to brook being thwarted.

A big, raking chestnut, on wires to be off, danced between the shafts of the dog-cart, irritably pawing the ground and jerking her handsome, satin-skinned head up and down with a restless jingle of bit and curb-chain. She showed considerably more of the white of a wicked-looking eye than was altogether reassuring as she fought impatiently against the compulsion of the steady hand which gripped the reins and kept her, against her will, at a standstill.

The instant she felt Jean's light foot on the step her excitement rose to fever heat. Surely this must mean that at last a start was imminent and that that firm, masterful pressure on the bit would be released! But Burke had leaned forward to tuck the light dust-rug round Jean's knees, and regarding this further delay as beyond bearing the chestnut created a diversion by going straight up in the air and prouetting gaily on her hind legs.

"Steady now!"

Burke's calm tones fell rebukingly on the quivering, sensitive ears, and down came two shining hoofs in response, as the mare condescended to resume a more normal pose. The next moment she was off at a swinging trot, beaking every now and again, out of pure exuberance of spirits, into a canter, sternly repressed by those dominating hands whose quiet mastery seemed conveyed along the reins as an electric current is carried by a wire.

"You needn't be afraid," remarked Burke. "She'll settle down in a few minutes. It's only a 'stable ahead' feeling she's suffering from. There's not an ounce of vice in her composition."

"I'm not afraid," replied Jean composedly.

(To Be Continued.)

A compact device for humidifying homes and apartments in winter has been produced.

## How Air Films Are Made

Handicaps Have Been Overcome By Use Of Motor Driven Cameras

Film stories of aviation present more handicaps during production than almost any other type of screen fare, according to Stephen Roberts. Mr. Roberts is the wartime aviator and former stunt flier who went to Hollywood to direct "Sky Bride."

"The one reason airplane movement fails to furnish thrills and interest is because of the 'plane's lack of background," he said on his return. "In playing action against a blank, even a clouded sky, it is difficult to convey a sense of speed."

"With the cameras on the ground, the airplanes usually are so distant that the speed is lost on the screen. With the cameras in a balloon or on a high tower, the range of their activity is limited. With the cameras in another 'plane, both camera-ship and the 'plane being photographed must travel at relatively the same speed to allow filming of close shots, and once more all sense of speed is lost."

"Electrically controlled cameras are the way we succeed in capturing effective scenes in the air. We attach these motor-driven cameras to the rim of the cockpits, pointing backward, right into the flier's face."

"We rehearse the scenes on the ground, then send the boys up alone. When the right altitude is reached, the actors press a switch and the camera starts grinding while the actor plays the scene himself, without direction."

## Little Helps For This Week

"Bear ye one another's burdens, and so fulfil the law of Christ." — Galatians vi. 2.

What is the real good?  
I asked in musing mood.  
Order, said the law-court;  
Knowledge, said the school;  
Truth, said the wise man;  
Pleasure said the fool;  
Love, said the maiden;  
Beauty, said the page;  
Freedom, said the dreamer;  
Home, said the sage;  
Fame, said the soldier;  
Equity, the seer:  
Spake my heart full sadly,  
"The answer is not here."  
Then within my bosom,  
Softly this I heard,  
"Each heart holds the secret,  
Kindness is the word!"

John Boyle O'Reilly.

But now God has so ordained it that we should learn to bear one another's burdens, for there is no one who has not some defect, no one without some burden, no one independent of others, no one wise enough of himself; but we ought to bear with one another, comfort one another, help, instruct, and advise one another.

—Thomas A. Kempis.

**For Scalds Or Burns.**—Dr. Thomas' Eclectric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

## Canada's Arctic Citizens

Over 7,000 Eskimos Living In Our Northern Hinterland

There are approximately 7,100 Eskimos in Arctic and sub-Arctic Canada, including Hudson Bay, scattered in small groups, principally in the Arctic Islands and along the northern sea-board. Canadian Eskimos are progressive. The more advanced have, in their homes, sewing machines, gramophones and radio outfits. In the Mackenzie delta and along the western Arctic coast the ambition of the head of a family is to own a schooner fitted with an auxiliary gasoline engine. At Aklavik during the summer as many as twenty-five of these schooners, all owned by natives, are frequently to be seen at one time.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Hawaii has a new biscuit and bread plant which cost half a million dollars.

The Chinese government has placed an order for freight cars in Scotland.

## Nervous Indigestion

Troubled for Years, Mrs. John Machon Thanks Dr. Williams' Pink Pills for Permanent Relief

Soon Saw  
A Great  
Change

"For many years I had been troubled with indigestion and my nerves," writes Mrs. John Machon, Calumet, Que. "I suffered constantly."

I tried many remedies, but without gaining any relief. I was unable to get any rest. I got a box of Dr. Williams' Pink Pills to give them a trial. I soon saw a great change. Now I can go to bed and have a good night's rest, and am able to do a day's work with any one. All I have to thank for it is Dr. Williams' Pink Pills. I would not be without them in the house."

Dr. Williams' Pink Pills are remarkably effective in cases like the above, because they create new rich blood which supplies to the nerves the very elements they need. Equally effective for all run-down and anaemic conditions. Try them. At your druggist's. 50c. a package.

## To Bring Back Prosperity

Only Way Is By Harder Work and Better Work

If we allow ourselves to believe that some intangible, mysterious thing called "recovery" is going to improve our lot without any assistance from ourselves we will soon lose the trenches we have gained. The last three years have chastened the instinct for laziness which is one of our racial disadvantages. The last three years has driven the well-dressed idler into work or obscurity. The last three years has forced us to place sport and recreation generally in their proper relation to the stubborn realities of life. We cannot afford to abandon the stern discipline we have learned. Harder work and better work is the only way to reach the promised land of prosperity. By the sweat of our brow alone will good times come again.—Daily Express, London, England.

Czecho-Slovakia may boost its beer tax.

## DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD  
WONDER PAPER

With so much inventive thought being given to eliminating unnecessary housework, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dusts—as it cleans—as it polishes is receiving a hearty welcome from Canadian women who detest dust cloths and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it.

Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework done in half the time and with half the effort. Doesn't the idea appeal to you?

## Special Offer

Wonder Paper is made by the makers of the famous PARA-SANI heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd.,  
Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Leftovers."

weather does not seem to be settled  
yet and we may get more moisture.Acme Golf Club has held a meeting  
and elected officers for the year. At  
last our neighboring town to the west  
has definitely decided to branch out  
in a real game. We will have to hold  
a local inter-town tournament with  
them some day this summer.**FATHER'S DAY**It will soon be Mother's Day, when  
the florists and the telegraph systems  
will do a rushing business; in fact  
some are so cruel as to suggest that  
the Florists Associations started Mo-  
ther's Day. However, while we are still  
strong for Mother's Day, we are going  
to make so bold as to suggest a Day  
for poor Father. Why, might we ask,  
should they all wait until poor father  
is face upwards, to put a lily in his  
hand?Father is the most essential part of  
the household furniture, as, if father  
does not keep moving, the works just  
stop. Father is the revenue account,  
while mother is the disbursement ac-  
count, added by the noble sons and  
beautiful daughters of the household.  
Besides, father is most accommodating.  
He goes to lodge, when sister is en-  
tertaining, and gets in wrong, when  
brother does some of the things he  
himself used to do when he was a boy,  
and seeks to cover things up. Father  
has to be stern, and look his part; in  
fact, he has got to get mad at times  
to get up enough steam to do his part  
without laughing.Father has a tough time all around.  
He is called 'Governor,' 'Old Man,'  
'Flat Tire,' 'Haywire,' and other pet  
names, while, if he is too free with his  
money, he is accused of being "in-  
dulgent" and if he is too close, he is  
accused of being "mean." Father is  
always in a draft, with drafts coming  
through the doors of his office, over  
the door, under the door, and through  
the keyhole. He has to act as referee,  
and referees are never popular. Poor  
Father, he has more troubles than a  
cranberry merchant, and why should  
he not be honored in life.
